The ERTICO Partnership is a public/private Partnership consisting of more than one hundred partners across 8 different sectors, all working towards bringing intelligence into mobility of people and goods in Europe. Together, ERTICO Partners conduct a range of activities to develop and deploy ITS to save lives, protect the environment and sustain mobility in the most cost-effective way. Aalborg University joined the ERTICO Partnership in 2014.

ERTICO provides partners with opportunities as listed below:
- Tailor made co-funded project opportunities with a high success rate to advance ITS according to priorities
- Cooperation with membership platforms bridging the gap between projects and deployment achieving long-term commitment and maintenance of services
- Interoperability testing in order to support deployment of interoperable ITS solutions
- Events for knowledge sharing, networking and visibility of stakeholders and promotion of ITS
- Advocacy to raise awareness and discuss ITS issues with all relevant stakeholders
- In order to reach societal/political goals, strengthening the competitiveness of the industry and optimising services for the user, the Partnership aims to couple the interests of public and private stakeholders.
